

[Revisión de las reformas del Gobierno de España en el Siglo XIX: el caso de Ramón María Narváez y su perfil político](#) Revisión de las reformas del Gobierno de España en el Siglo XIX: el caso de Ramón María Narváez y su perfil político. The article presents a review of the work of the seven governments of Ramón María Narváez y Campos under the reign of Isabell II, a time of great changes and deep political alternations, as is present when having to conform the I Duke of Valencia to a total of seven governments, with the support of the Moderate Party. The methodology consists of a comparison and review of historical bibliographic sources and archives, going to the oldest sources in order to have a vision with aspects that sometimes have not been taken too much into account, thus helping a historiographical debate. The development of the article confirms the reforms that were carried out during the seven governments, with a profound scope in Spain, and some of which lasted over time. Thus, we observe how the governments had a greater reformist scope than in other literature has been considered, leaving aside the reforms of Ramón María Narváez, their significance and their importance.
